

Cut Vinyl Application

1

Clean

Clean application surface and allow to fully dry -- rubbing alcohol advised

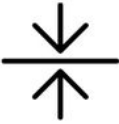

2

Peel

Carefully peel away paper backing, ensuring vinyl sticks entirely to tape

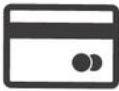

3

Align & Press

Align the decal and carefully place decal on surface

4

Smooth

Use a credit card to smooth design over surface, top to bottom

5

Remove

Carefully remove transfer tape by peeling back, beginning at the corner, and let cure for 24 hours before washing

Important Notes

It is not recommended that line weight to go thinner than a .25" The bolder the better for both cutting and application.

Vinyl does not come in metallic, frosted or pearlized material

Be extra careful when applying decals. The Ink Spot will not be responsible for damage that happens to the vinyl decals during application.
